Quality management

Quality is a philosophy and our passion.

Management systems · Auditing · Training

WHAT QUALITY MANAGEMENT DELIVERS

Show your strongest side.

1. **Clear, measurable objectives**
   instead of gut-feeling decisions.
2. **Smooth processes**
   without losses at the interfaces.
3. **Lasting cost reductions**
   through efficient processes.
4. **Customer trust**
   through a certified system.
5. **Motivated employees**
   with real quality awareness.

Now: ISO 9001:2026

The new edition has been published. Existing certificates must be transitioned by September 30, 2029. We support you with the transition.

OUR SERVICES

Three pillars, one goal.

Management systems through to certification

Implementation, further development and support up to the certification audit: ISO 9001, IATF 16949, EN 9100, ISO 13485, ISO 14001, ISO 27001 and more.

Auditing incl. iVision®

Internal audits, supplier audits and VDA 6.3 process audits, also as remote audits with iVision® on request.

Training

Seminars, webinars and in-house training on standards, audits and core tools, practical and to the point.

DIN EN ISO 9001 does not require a thick QM manual. We document only what you really need.

HOW WE WORK

Quality is a cycle.

- **Consult:** think first, then certify.
- **Train:** no death by PowerPoint.
- **Audit:** we find it before your customer does.
- **Improve:** actions that survive Monday.

Step by step, aligned with management and employees. The goal: your team can do it on its own.
And yes: quality management is allowed to be fun.
